## Document Purpose

The purpose of this document is to describe the GET STATUS API Operation to enable merchant developers to integrate their webpages with the EVO Gateway. Refer to the *EVO Gateway – 0 – Overview* document for how this API Operation is used in the merchant processes.

The GET STATUS – API Operation provides a method to check the status of a transaction in the EVO Gateway. Although, each EVO Gateway API Operation provides the resulting status after a transaction has been processed, the merchant may want to reconcile data in their local database to that in the EVO Gateway.

The transaction is queried by the Merchant’s transaction identifier or by the transaction identifier the EVO Gateway.

# 1 Session Token API Operation

## 1.1 Session Token Request

### 1.1.1 Format

POST Request to Session Token Request URL (see Section 3 of the *EVO Gateway – 0 – Overview* document)
